Application/Control Number: 10/720,961

Art Unit: 2192

## **DETAILED ACTION**

- 1. This office action is in response to the amendment filed on 11/26/2007.
- 2. Claims 1, 7 and 13 have been amended.
- 3. Claims 1, 3-8, 10-13 and 15-18 remain pending and now being allowed (renumbered as claims 1-15).

## Allowable Subject Matter

As Applicants amended the independent claims 1, 7 and 13, the closest cited 4. prior art of Miller (Robert C. Miller, Lightweight Structure in Text, May 2002), taken alone or in combination, fails to teach or fairly suggest at least the feature of a method for developing source code including automatically maintaining a record of status of each respective source code statement, said record of status including, with respect to each of one or more said source code statements, whether the respective source code statement has been generated as a copy of a source code statement other than the respective source code statement and automatically determining whether one or more copies of said first source code statement exist within said source code file based on said status of each respective source code statement or including, with respect to each of one or more said source code statements, whether the respective source code statement has previously been verified by an automated verification process as conforming to a pre-defined set of source code requirements. As the Applicant points out Miller does not teach or otherwise render obvious the maintenance of Art Unit: 2192

"status" information as now defined with respect to source code statements. Nor does Miller teach or disclose the user of such status information in an "automatically determining" step for either determining whether copies of a source code statement exist or for determining whether a source code statement has been previously verified. In as such manners as in each of independent claims 1, 7 and 13 and the dependent claims are allowable for at least the same reasons.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zheng Wei whose telephone number is (571) 270-1059 and Fax number is (571) 270-02059. The examiner can normally be reached on Monday-Thursday 8:00-15:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tuan Q. Dam can be reached on (571) 272-3695. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2192

Any inquiry of a general nature of relating to the status of this application or proceeding should be directed to the TC 2100 Group receptionist whose telephone number is 571-272-1000.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
